DETAILED ACTION***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1,6,11,16 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1,3,5-8 of prior U.S. Patent No. 6,444,618. This is a double patenting rejection.

Claims 2,3,7,8,15,17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3,5-8 of U.S. Patent No. 6,444,618 as applied to claims 1,6,11,16 above. See Statutory Double Patenting Rejection above. Aven in US '618 discloses all of the limitations in claims 2,3,7,8,17 except for the composition explicitly comprising metconazole, silicone defoamer and instant ratio of ingredients. It would have been obvious to employ metconazole and a silicone defoamer in the prior art claims since Aven in US '618 list metconazole as a possible active and a silicone compound as a defoamer for the prior art invention. See column 2 line 53 – column 3 line 31, column 8 lines 26-38. With respect to the instant ratios of ingredients, one would have been expected to determine the optimum ratio of ingredients for the invention. One would have been motivated to do

this in order to develop a composition that would have been most effective in controlling fungal growth.
